

Aluminium Staircase Towers are ideal for high traffic areas where workers need to move through different levels. They provide quick, easy and safe movement. Walkthrough Frames can also be incorporated to join towers.

Each flight of the lightweight easy erect staircase towers raises 1.5 metres and are compatible with Access' 2.5metre long, 220 Series Scaffolding. Individual lengths: 1.3 x 2.5m.

Some examples of our aluminium staircase towers in action
